

# DOXIMICIN® Oral Solution

## BROAD SPECTRUM ANTIMICROBIAL.

**Doximicin®** is indicated for the treatment of upper and lower respiratory tract infections caused by sensitive etiological agents, such as primary infectious pictures or those associated with respiratory virosis, bacterial skin infections, eye and peri-eye infections caused by Chlamydiae or other strains Sensitive, Canine Ehrlichiosis and Canine and Feline Mycoplasmosis (Hemobartonellosis).

Presentation in oral solution, in addition to facilitating administration, avoids the risk of causing esophageal narrowing in cats.

## Technical Specification

### SPECIES

Dogs and cats.
